Alternate Email: alifurrahman1999@gmail.com

Career Objective:

A collaborative and systems-oriented developer passionate about building strong technical foundations through teamwork. I aim to join a team where I can leverage my experience in designing resilient backends and scalable architectures, collaborating to translate complex challenges into reliable and efficient solutions that empower exceptional user experiences.

Career Summary:

I've spent over four years as a backend developer, focusing on building and scaling reliable applications with Laravel and modern PHP. My work centers on creating systems that perform well under pressure and handle data securely. Proven track record in building complex, data-sensitive systems such as multi-version financial CRMs and social media automation platforms. My professional foundation in object-oriented design, secure API integrations, and database optimization provides a versatile skill set that extends to other modern technologies. Through project-based work and continuous learning, I have developed practical proficiency and a strong conceptual understanding of backend development with Node.js and Python Django/Flask, and I am adept at adapting core development principles to diverse technology stacks to deliver robust, efficient solutions.

Special Qualification:

Core Backend & Architecture

✓ Expertise in Backend Development: Strong professional proficiency in the Laravel ecosystem with modern PHP for enterprise applications, coupled with project-based hands-on experience and conceptual mastery of backend development using Node.js and Python (Django/Flask) for versatile full-stack solutions.

Systems, Databases & DevOps

✓ Architect for Scalable Systems: Proven skill in designing and optimizing MySQL/MariaDB and PostgreSQL databases for high traffic platforms. Experienced in Docker containerization, CI/CD pipelines (GitHub Actions), and VPS/Cloud server management (AWS, DigitalOcean) for reliable deployment.

✓ API & Integration Specialist: Extensive experience building and integrating secure RESTful APIs and GraphQL endpoints, including complex payment systems critical for financial, microfinance, or donor management platforms.

Methodology & Collaboration

✓ Modern Development Workflow Professional: A quick learner proficient in advanced Git workflows and collaborative development practices. Applies object-oriented design and SOLID principles to write clean, maintainable, and scalable code, with an aptitude for efficiently mastering new technologies and project domains.

✓ Effective Frontend Collaboration: Practical experience with frontend technologies (HTML, CSS, JavaScript ES6+, React/Vue basics) enables seamless collaboration with frontend teams to design efficient APIs, integrate components, and build cohesive full-stack applications.

Portfolio, Collaboration & Client Work

✓ Professional Client Collaboration: Experienced in developing and maintaining backend systems for global clients through private repositories, adhering to strict confidentiality and project delivery standards. A record of project work and professional development is available for review on GitHub (<https://github.com/alifur-rahman>) and my personal portfolio site (<https://alifur.garmentsbridge.com/>).

Employment History:

Total Year of Experience: 4.7 yrs

01 Full Stack Developer (Remote) (1.7 yrs)
(01 April, 2024 - 30 November, 2025)

KodeX Srl

Via Empedocle, 9, San Cataldo, CL 93017, Italy

Duties/Responsibilities

Developed advanced modules and plugins for the Nextpost automation system, enhancing functionality for Instagram marketing, scheduling, and user management. Implemented and customized payment gateway integrations, including recurring billing, transaction validation, and secure workflow handling. Designed and built a complete Social Academy module featuring structured lessons, content management tools, and creator-friendly admin controls. Built new content-creation features, including media templates, writer sections, and content planning utilities. Optimized backend performance for high-traffic environments using PHP OOP and efficient SQL structuring.

- 02

Jr. Software Developer (1.2 yrs)
(01 February, 2023 - 31 March, 2024)
IT Corner Limited
Niloy Plaza, Khilgaon Railgate, Dhaka, Bangladesh
Duties/Responsibilities
Worked on MD5 Trading CRM, a Forex-focused customer management system similar to FXCRM, built fully in Laravel and supporting multi-version architecture (Lite, Pro, and Minimal). Contributed across all CRM versions, improving user flows, optimizing backend logic, and enhancing dashboard performance for high-visibility trading data. Developed and maintained a Progressive Web App (PWA) version of the CRM using Laravel, enabling smoother cross-device access and offline-ready features. Participated in NFT platform development, handling backend logic, metadata processing, user asset storage, and secure transaction workflows—improved system stability through structured database design, optimized SQL queries, and clean Laravel OOP practices.
- 03

Web Developer (0.8 yrs)
(01 April, 2022 - 31 January, 2023)
Amin IT Ltd.
Road-4, Nikunja-2, Khilkhhet, Dhaka, Bangladesh
Duties/Responsibilities
Developed scalable web applications, including News Portals, Education Management Systems, E-commerce platforms, and Multi-Vendor systems using Laravel and Lumen. Implemented secure data handling and efficient database structures with MySQL/MariaDB to ensure high performance, optimized queries, and data integrity. Built responsive front-end interfaces using JavaScript, HTML, and CSS, ensuring seamless integration with Laravel-based backends for dynamic user experiences. Carried out database design and data analysis to support reporting features, admin dashboards, and user-friendly content management workflows.
- 04

Web Developer (1.1 yrs)
(01 March, 2021 - 31 March, 2022)
Mimosa IT
Road-13, Nikunja-2, Khilhet, Dhaka, Bangladesh
Duties/Responsibilities
Developed a comprehensive Medical College Management System featuring student enrollment, faculty management, course scheduling, and administrative dashboards using PHP (OOP) and MySQL. Customized WordPress e-commerce solutions with tailored functionality for product catalogs, payment integration, and user-friendly shopping experiences. Engineered responsive front-end interfaces using HTML, CSS, jQuery, and JavaScript for dynamic user interaction and seamless mobile compatibility.

Academic Qualification:

#	Exam Title	Major Subject	Institute	Result	Passing Year	Duration
01	Bachelor with Hons. (Four Years/Semester)	BSc in Computer Science & Engineering	European University of Bangladesh	CGPA 3.16 (out of 4.00)	2025	4 years
02	Higher Secondary or Equivalent	Computer Science & Technology	Thakurgaon Polytechnic Institute, Thakurgaon	CGPA 3.47 (out of 4.00)	2020	4 years
03	Secondary or Equivalent	Science	Purbo Begun Bari Nutun Para Dhakil Madrasha, Thakurgaon	GPA 4.79 (out of 5.00)	2016	2 years

Training Summary:

#	Training Title	Topic	Institute	Year	Duration
01	Diploma Engineering Internship	Web Development	Coder IT Solution	2020	8+ Months

Career and Application Information:

Looking For

: Mid Level Job

Available For

: Full Time

Present Salary

: 50,000.00 TK

Expected Salary

: 60,000.00 TK

Preferred Job Category

: Backend Development, Software Development, Web Development, Full-Stack Development, Information Technology

Preferred District

: Thakurgaon, Dinajpur, Rangpur, Dhaka

Preferred Organization Types

: Any types of organization

Specialization:

Fields of Specialization	Description
--------------------------	-------------

Full-Cycle Backend Development	End-to-end expertise in architecting, developing, and deploying scalable backend systems. This encompasses designing robust server-side logic and application architecture, relational database design and optimization, secure API development and third-party integration, and systematic performance tuning for high-traffic environments. The specialization ensures delivery of efficient, secure, and maintainable solutions from concept to production.
--------------------------------	--

Extra Curricular Activities:

- ✓ Open-Source Contributor & Tech Community Member: Actively share knowledge and solutions on platforms like Stack Overflow and GitHub. This practice sharpens analytical and problem-solving skills by dissecting complex issues and fosters a spirit of collaborative teamwork within the global developer community.
- ✓ Pro Bono Technical Advisor: Provide voluntary technical guidance to local small businesses and student initiatives. This role requires excellent communication skills to explain technical concepts clearly and demonstrates a commitment to ethics and community support by offering skills for social good.
- ✓ Digital Literacy Workshop Facilitator: Previously organized and led basic computer literacy sessions. This experience honed the ability to work independently to organize events and communicate effectively with non-technical audiences, empowering others with practical knowledge.
- ✓ Continuous Learning Practitioner: Maintain a disciplined practice of building personal projects and exploring new technologies like DevOps. This self-directed learning showcases a strong commitment to professional growth and problem-solving initiative, ensuring skills remain adaptable and current.

Language Proficiency:

Language	Reading	Writing	Speaking
Bangla	High	High	High
English	High	High	Medium

Personal Details:

Father's Name	: Ms. Saidur Rahman
Mother's Name	: lovele Begum
Date of Birth	: March 11, 2020
Gender	: Male
Height (Feet)	: 5.7
Weight (Kg)	: 68
Marital Status	: Unmarried
Nationality	: Bangladeshi
National Id No	: 4665169936
Religion	: Islam
Permanent Address	: Torotbari, Birganj, Dinajpur, Bangladesh 5220
Current Location	: Dhaka
Blood Group	: B+
